	Parfum/Fragrance	0.50%

With WESOURCE

White Solid Wax / Packaging: Stick

STABILITY: M1 at RT

FORMULATION ADVICES: Laboratory Scale - 100 g

Put all the ingredients in a beaker and melt them in a water-bath at 80°C. Remove the beaker from the water-bath and add all the heat-sensitive ingredients (AQUAXYL™ and the Fragrance). Once the mixture is homogeneous, pour it in the sticks.

An intense sensory wax for a comfortable cream all day-long!

Small, easily transportable and practical, this stick is the essential accessory for a cutaneous protection !

MONTANOV™ 202 & SENSANOV™ WR, the emulsifiers for creamy textures and a velvety touch !

MONTANOV™ 202 (Arachidyl Alcohol and Behenyl Alcohol and Arachidyl Glucoside). By forming liquid crystals around the oil droplets, this glycolipid emulsifier **regulates the stability** of the formula maintaining hydration through a soft evanescent touch.

SENSANOV™ WR (C20-22 Alkyl Phosphate and C20-22 Alcohols). This phosphate anionic emulsifier effective at low dosage provides a **light feel** thanks to a **soft and matte** finish on the skin. The skin is considerably more flexible and comfortable !

MONTANOV™ 202 & the texturing agent and waxy co-emulsifier LANOL P ÉCAILLES (Glycol Palmitate) **contribute to the stick formation.**

LANOL P ÉCAILLES & LANOL 14M, two sensory butters for a rich and melting after feel.

LANOL 14M (Myreth-3 Myristate). Thanks to its emollient properties, it gives consistency to the formula revealing a **melting touch**. Having a melting point close to the body temperature, it melts with skin contact and contributes to the flexibility of the skin.

EMOGREEN™ L19 & EMOGREEN™ L15, pure alkanes for even more softness and comfort, with only one INCI ! (C15-C19 Alkanes)

EMOGREEN™ L19 Non-polar and biodegradable emollient, it brings a **fresh and gliding sensation**, with a soft and comfortable after feel, ideal for dry skins.

EMOGREEN™ L15 Acting as an excellent alternative to silicone oil, it provides a soft and non-greasy after feel through a **powdery finish**.

An anti-aging and moisturizing day stick with SEPIlift™ DPHP. AQUAXYL completes the hydrating action by boosting the water circulation in all skin layers.

AQUAXYL (Xylitylglycoside and Anhydroxylitol and Xylitol).

SEPIlift DPHP (Dipalmitoyl Hydroxyproline). Plant-derived hydroxyproline lipovector, it **moisturizes and firms up skin tissues**. It also contributes to the stabilization of the formula.

ADDITIONAL INGREDIENTS : Hydrogenated Olive oil cetyl esters : PHYTOWAX 16L55 (SOPHIM) / Butyrospermum parkii butter : BEURRE DE KARITÉ (SOPHIM) / Fragrance : Parfum Aloe Bamboo Hydro (EXPRESSIONS PARFUMES).

A formula related to SOLID COSMETICS concept.
