				100.00

Manufacturing procedure:

1. Fuse elements of phase A until clear at 80 to 85°C.
2. Cool mass down to 78°C. Add components of phase B to those of phase A while stirring. Solve until particle free.
3. Pour into lipstick form at 78 to 75°C .
4. After cooling down to room temperature, let the forms freeze out at -18°C for 30 minutes.
5. When having reached room temperature, retract sticks from the cases.

Specification values:

- Appearance: orange lip care in pump dispenser
- Stability: more than 3 months stable at 20°C, 40°C and 4°C

Description:

Exclusive natural care components like precious AstaCos® renew and smoothen chapped lips and reduce wrinkles. Moisturising effect, especially recommended for usage at low temperatures and in dry weather and when doing winter-sports like skiing etc. – successfully tested in Austrian winter conditions.
