			TOTAL	100,00

PROCEDURE

1. In a clean metallic beaker, weigh the ingredients A.1 to A.5 and heat them to 80°C with magnetic stirring.
2. When the bulk is melt, switch to a marine blade at low speed for colling down process.
3. Add A.6, A.7, A.8 and A.9 when the product is below 50°C.
4. Separate the bulk into 2/3, 1/3.
5. With the 2/3 fill the lower part of the candle.
6. With the last third, whip it with a robot, several times passing the bulk at 4°C between every whipping step.
7. Fill the top of the candle with a disposable piping bag.

CONTROL

Appearance: Solid golden whipped anhydrous balm.
Stability Test: 3 months at 50°C, 40°C and RT.

DIRECTIONS

Light the candle and wait for the surface to melt and pour it into your hands and then massage the body.

TARGET

All skin types.
